

LogBook: 4

Meeting No: 10

Date: 2025-11-24

Start Time: 7:40 AM

Last Visit Date: 2025-12-08

Finish Time: 8:30 AM

Items discussed:

- Studied backend-related journals focusing on:
 - Financial components required in the system
 - Business, marketing, and legal reasons behind using these financial attributes
- Analyzed potential actors for the use-case diagram:
 - Admin, Seller, Buyer, Delivery Partner, Finance Team, Support Team, Guest User
- Identified and finalized different user roles needed for the platform

Achievements:

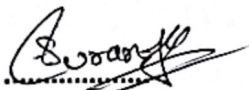

- Successfully reviewed multiple backend-related journals and extracted key financial, business, marketing, and legal attributes relevant to the system.
- Documented all identified actors and their responsibilities for the use-case diagram.
- Finalized the list of user roles required for the platform, ensuring clarity for further system design.

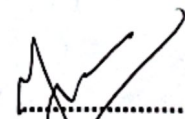

Problems (if any):

- Some journals had overlapping or unclear terminology in their diagrams, which made mapping attributes to system requirements slightly time-consuming.

Tasks for Next Meeting:

- Prepare the SRS (Software Requirement Specification) document, including functional and non-functional requirements.
- Work on detailed Use Case descriptions and diagrams for the system, covering all identified actors and system interactions.
- Design the ERD (Entity Relationship Diagram) with complete entities, attributes, and relationships for the project.

Suraksha Sapkota

Sandip Dhakal (1st Supervisor)
